Vitamin D3 (iu/kg)	3000
Vitamin E (mg/kg)	250

Revised: 28/08/2007

Forage Booster:

- Multi purpose feed block suitable for cattle and sheep, in particular those on Winter/Autumn grazing situations or on diets of high fibre roughages.

It is particularly suitable for:

- Higher performing hill sheep
- Lowland sheep through mid pregnancy
- Higher performing cattle
- Store Cattle diets.
- Forage Booster feed block has a high energy and protein content with a low inclusion of urea.

Feeding Instructions

Ad-lib forage must be available at all times. Place forage booster evenly over the entire grazing area. Regularly alter the feeding point to prevent poaching. When feeding indoors, place away from the water source. Ensure a clean water supply is available at all times.

Distribution: Sheep – 1 Block per 25 to 30 ewes.
Cattle – 1 Block per 12 Animals.

Availability: 25kg Bag
