All feeding guidelines should be strictly followed.

The benefits of feeding Organic Seaweed

- There are a growing number of research findings to support the importance of including seaweed in many animals diets.
- One such study found that the inclusion of seaweed led to an improvement in the Immune system of the animal helping them become more disease resistant and could even aid in the reduction of shipping stress and to reduce the risk of E-Coli in cattle.
- High levels of Iodine in seaweed can to help reduce the risk of Thyroid conditions such as enlarged thyroid glands and also acts as an antibiotic and helps to kill germs.
- Nutribio's Organic Seaweed Range contains over 60 minerals and Trace Elements and is rich in Amino Acid vitamins and growth factors.
- Due to the fact that seaweed is rich in amino acids. Vitamins, minerals and trace elements it is also known as a great promoter of glandular health, especially for the pituitary, adrenal and thyroid glands.
- Seaweed can help prevent: birth defects, goiter and pituitary/thyroid problems to name but a few.
