

BACTICUBE

USAGE

Bacticube has proven its worth on dairy farms, particularly in the control of environmental mastitis however, it is also suitable for use in piggeries, hatcheries, farm yards, stables, anywhere that animals are housed.

More specific situations are:

- Calves: Either individually housed or group housed.
- Pigs: For suckling / weaning and with dry and nursing sows.
- Poultry: For broilers, turkeys, etc.
- Sheep: Where ewes are housed at lambing or lambs are in housing.
- Horses: Ideal for lactating mares and foals.
- Dogs: Kennels and bedding.

Use Bacticube for Clean and Healthy Animals leading to:

- Profitable livestock farming
- Reduced disease costs
- Reduced need for medication
- Increased livability
- A better environment

Directions for Use

Sprinkle liberally at back of cubicle daily.

Recommended Usage

75g - 100g (2.5-3.5oz) per cubicle space.

Warnings

Ensure cubicles are cleaned down prior to application of Bacticube.

BACTICUBE

BACTICUBE

Bacticube is a broad spectrum disinfectant containing Apex, a unique blend of natural plant extracts, especially selected for their bactericidal properties.

Apex is completely natural and biodegradable. Bacticube contains the following natural plant extracts: Rosemary, Thyme, Pine Needle, Tea Tree and Garlic.

This unique blend of plant extracts has the following proven properties:

- Anti Microbial
- Anti Inflammatory
- Anti Fungal
- Anti Viral
- Anti Septic

Bacticube rapidly neutralises floor surfaces and inhibits the growth of pathogens: Streptococci, Straphylococci, E-Coli, Salmonella, Clostridia, Listeria and Campylobacter.

BACTICUBE

PRODUCT BENEFITS

- Bactericidal properties kill bacteria and aid in the control of
 - ◆ Environmental mastitis
 - ◆ Diarrhoea
 - ◆ Septicaemia
 - ◆ Foot disease
- Anti-viral, anti-fungal, anti-inflammatory & anti-microbial.
- Non-irritable to teats
- Contains a very strong antiseptic effective for healing chapped and sore teats.
- Fully soluble in slurry tanks
- Environmentally friendly
- Economically justified
- Safe and easy to use, non-toxic
- User-friendly, may be applied while livestock are in situ.

BACTICUBE

Bacticube – Essential in the Control of Environmental Mastitis

Mastitis Costs You Money

COSTS OF CLINICAL MASTITIS

- Intramammary treatment costs
- Injectable antibiotics
- Discarded milk (milk withdrawal)
- Veterinary fees
- Culling costs
- Lost animals

Sub-Clinical Mastitis is present in up to 50% of apparently normal cows. (Source Teagasc Research)

COST OF SUB-CLINICAL MASTITIS

- Reduced Milk Yield
- Poor milk quality
- Increase TBC
- Reduced solids
- Premature culling of infected animals

Remember Bacticube has proven effectiveness against the major mastitis causing organisms.
