### Benefits of the Flowtrace Products

Use Nutribio flow trace range with a good management system and help prevent costly mineral and vitamin deficiencies : - **calv abortions, pernatal calv deaths, retained placenta, calv deaths, mastitis, hoof problems, poor thrive, whote muscle disease, reduced milk yield.**

### Advantages of the Nutribio Flowtrace range

**Effective:** Soluble nutrients are easily absorbed. Contains trace elements that are stable over a wide pH range. Backed by research.

**Easy To Use:** Simply follow easy to use instructions on pack.

**Established Brand:** The Flowtrace brand is well established as a quality brand backed by extensive research.

**Unique:** The only company that offers such choice and flexibility in liquid major and trace element products.

Flowtraces are blue to ensure that farmers knows it is present. **Products must be diluted either 1 : 10 or 1:40 depending on the product before they are used.**

### How to administer the Product

FlowTrace products are administered through the drinking trough using one of two suggested methods. **Method 1:** Using a Proportioner Pump. This is an on-line metering pump treating all drinking troughs.

**Method 2:** Using a Dispenser. The daily dose is added into the drum (depends on the number of animals), the dispenser is attached to drum & placed in the drinking water.
